

## TRANSIT

### Sanitarios

**Diseño:** Lavernia y Cienfuegos. **Año:** 2006.

**Cliente:** Sanico.

**Características:** Serie de sanitarios, inodoro y bidé, que combina STONEFEEL® (blanco, crema o antracita) en el exterior y porcelana en el interior. La resina mineral STONEFEEL® se combina con la porcelana formando una pieza en la que cada material aporta sus cualidades: la porcelana, su limpieza e higiene, y el STONEFEEL® su textura sedosa y su capacidad de crear planos y formas que en porcelana no se pueden conseguir.

El inodoro se presenta en dos versiones: con cisterna empotrada y con cisterna externa.

**Premio:** Design Plus del German Design Council. 2007

### Bathroom fittings

**Design:** Lavernia & Cienfuegos. **Year:** 2006.

**Client:** Sanico.

**Description:** A range of bathroom fittings, lavatories and bidet, made out of STONEFEEL® (white, beige or anthracite) on the outside, and porcelain on the inside. STONEFEEL® (mineral resin) and porcelain are combined to create a product in which each material offers its own qualities: the porcelain is clean and hygienic, while the STONEFEEL® has a silky texture and is able to be molded into shapes and forms that porcelain can not.

Two different versions of the lavatories were designed, one with an external tank, and another tank to be fitted in a rear wall.

**Award:** Design Plus of the German Design Council. 2007
